

Pluralism about Joint Action

s.butterfill@warwick.ac.uk

the 'potential role of shared emotions in [...] joint action'

the 'potential role of shared emotions in [...] joint action'

What motivates people to engage in joint action?

What are the perceptual, cognitive, and motor processes
that enable effective joint action?

the 'potential role of shared emotions in [...] joint action'

What motivates people to engage in joint action?

What are the perceptual, cognitive, and motor processes that enable effective joint action?

What distinguishes joint from individual actions?

The Obstacle

walking together

Shared emotion is not a feature of every joint action.

There are characteristic features common to all joint actions (e.g. shared intention).

Only such features are relevant to answering constitutive questions about what joint action is.

Shared Intention

**'I take a collective action to involve
a collective intention.'**

'the key property of joint action lies in its internal component [...] in the participants' having a "collective" or "shared" intention.'

(Facundo Alonso, 2009, pp. 444-5)

awareness of joint-ness

at least one of the agents knows that they are not acting individually; she or they have ‘a conception of themselves as contributors to a collective end.’

awareness of others’ agency

at least one of the agents is aware of one or more of the others as an intentional agent.

awareness of others’ states or commitments

at least one of the agents who are F-ing is aware of, or has individuating beliefs about, some of the others’ intentions, beliefs or commitments concerning F.

awareness of joint-ness

at least one of the agents knows that they are not acting individually; she or they have ‘a conception of themselves as contributors to a collective end.’

awareness of others’ agency

at least one of the agents is aware of one or more of the others as an intentional agent.

Plural activity

- multiple agents' activities are individually organised around a single outcome
- this outcome occurs as a common effect of, or is constituted by, all their activities

Plural activity

- multiple agents' activities are individually organised around a single outcome
- this outcome occurs as a common effect of, or is constituted by, all their activities

Plural activity

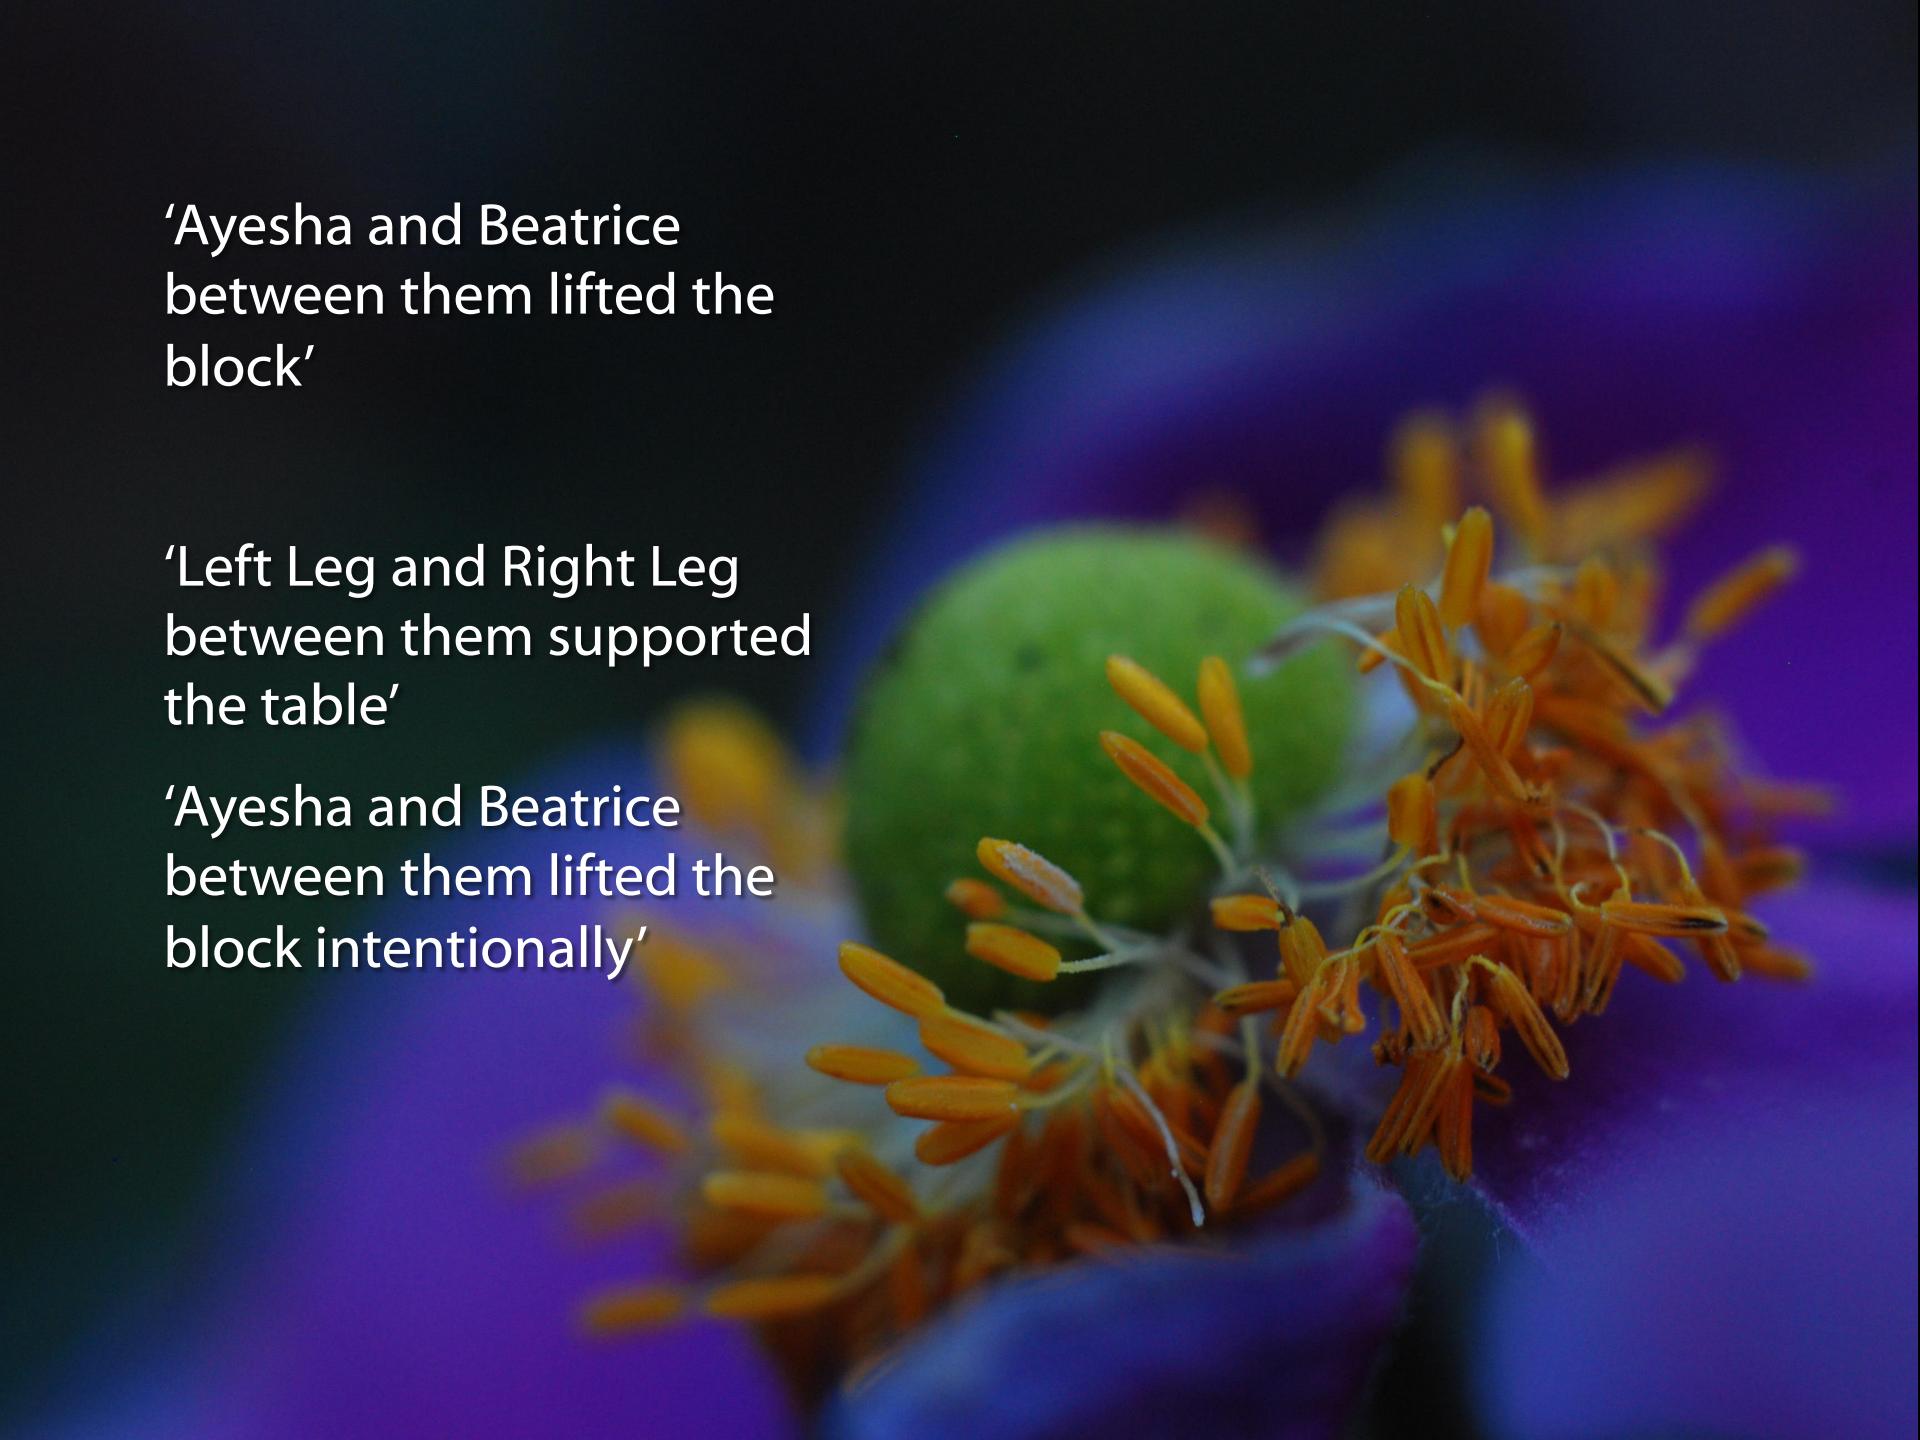

- multiple agents' activities are individually organised around a single outcome
- this outcome occurs as a common effect of, or is constituted by, all their activities

Almost sufficient conditions for joint action

- plural activity
- something coordinates the agents' activities
- the coordination is, or would normally be, among the causes of the outcome
